- incast 4
- incast 8
- incast 16
- NVLink credit
- - rnic-nn packet
- ... rnic-nn fluid

Nine frozen seeds; every shade is the pointwise seed min-max band.

Evidence: SIMULATED FCT; MEASURED endpoint plateaus; DECLARED packet and credit constants; STRUCTURAL NV4 switch identity.

SIMULATED MESH EXTRAPOLATION at degrees 4/8/16; no NV4 hardware counterpart; NVSwitch-class hardware is the physical route

SMALL-FLOW INCAST IS A MODEL PREDICTION; real true-sync launch is not constructible through sequential PCIe writes; hardware identification is long-flow only
