

NV4 long-flow incast: measured hardware against scored simulation

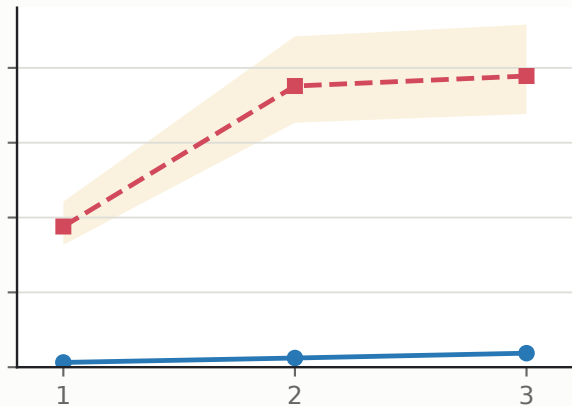

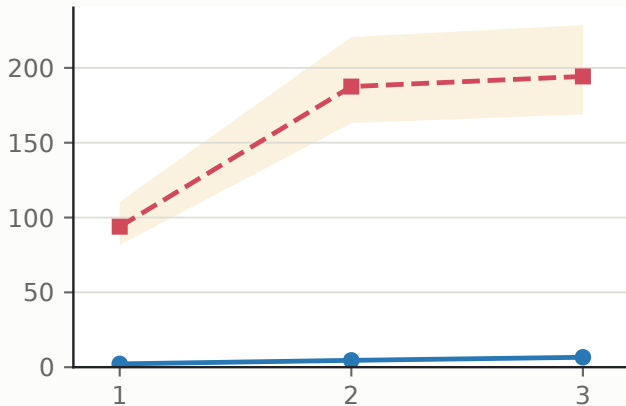

Diagnostic only: run void because frozen launch-skew guard FG11 failed

Measured hardware Scored simulation Frozen $\pm 15\%$ band

256 KiB per sender

512 KiB per sender

Aggregate receiver payload goodput (GB/s)

Incast degree (senders into GPU 0)

Incast degree (senders into GPU 0)

Hardware degrees 1 to 3 only. Degrees 4, 8 and 16 remain declared simulation; no small-flow hardware claim.
