

Kernel efficiency ledger

264 source-void cells retained; 5 missing-work kernels unranked

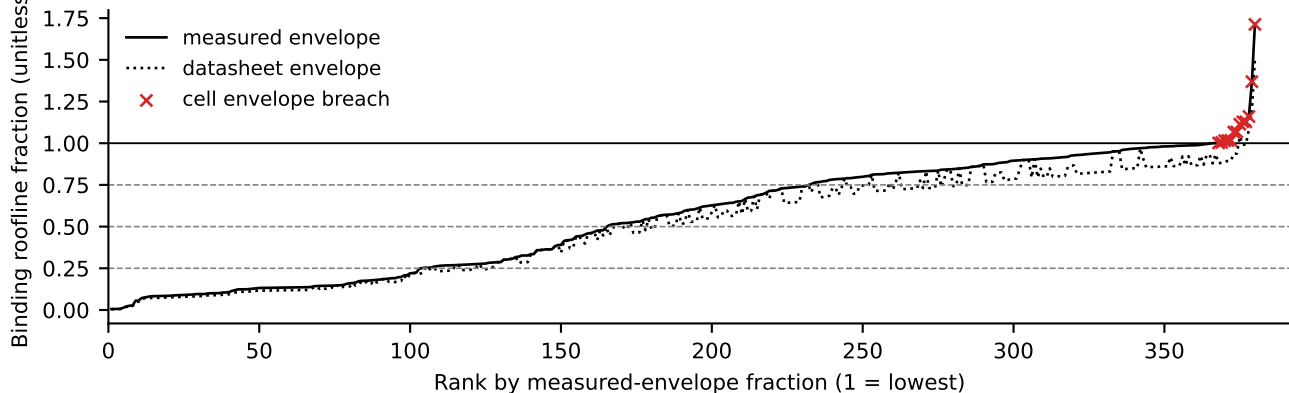

A: A100 arithmetic roofline

B: Memory rates, both devices

C: All 380 declared-work cells, including void cells

Kernel family (panels A and B)

decode attention GEMM elementwise and norm
prefill attention MoE and routing HBM streaming

○ Shape: A100 ● Filled: nonvoid source and cell
▲ Shape: GH200 ○ Hollow: void source or cell
