—●— NVLink credit
 - - -●- rnic-nn packet
 ····●··· rnic-nn fluid

Jain index of per-flow goodput within each release wave; lines are wave and seed means.

Evidence: SIMULATED FCT; MEASURED endpoint plateaus; DECLARED packet and credit constants; STRUCTURAL NV4 switch identity.

SIMULATED MESH EXTRAPOLATION at degrees 4/8/16; no NV4 hardware counterpart; NVSwitch-class hardware is the physical route

SMALL-FLOW INCAST IS A MODEL PREDICTION; real true-sync launch is not constructible through sequential PCIe writes; hardware identification is long-flow only
