

**DeepSeek-V3 second scored run: held-out prefill REFUTED (max 13.98%)**  
**MTP BLOCKED (COMP-72); decode calibration 59.83% low (28.6 ms declared vs 11.5 ms implied)**

Verdict scope: priced 2K and 4K prefill anchors only. The MTP anchor is blocked and decode is a disclosed calibration miss.

Prefill and decode are separate disclosure experiments. Bands carry record, inherited-constant and zero-width COMP-74 distribution terms.
